DETAILED ACTION

Response to Amendment

1. The amendment after final rejection, filed 29 June 2004, has been entered.
2. A thorough review of the filewrapper has been made. While applicant's amendment has overcome the previous rejections, a new rejection under 35 USC 112, 1st paragraph must be addressed before the application can be passed to allowance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 9-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims limit the sole plate to being "arranged to be held relative thereto in a plurality of positions". However, the specification, page 9, paragraph 3, describes the sole plate as: "It can be seen from Figures 12 and 13, that the body (36) also includes a pivotable sole plate (48). The sole plate (48) is pivotable about pivot point (50). The pivot point (50) includes a means (not shown) for allowing the sole plate (48) to be held at any one of a desired position around the range of possible pivotable positions about the point (50)." Applicant has not described the means for holding the pivot point in a plurality of positions in such a way as to enable one skilled in the art to make and/or use

the invention. As the structure of means is not shown, described, or claimed, any amendment would have to be considered new matter. The specification is only enabling for positioning the sole plate as shown in figures 12 and 13, and not "the range of possible pivotable positions about point (50)." An amendment to the claims, to limit the pivot positions to those shown in figures 12 and 13 only would overcome this rejection.

Conclusion

5. This Office action is made non-final, to allow applicant the opportunity to respond to the above new grounds of rejection.
